

Comments on PRC Docket N2021-1

June 5, 2021

To the Postal Regulatory Commission:

I am a US citizen who relies heavily on the Postal Service and am not associated with the US Postal System. I am writing in strong opposition to the proposed changes to our US Postal System under PRC Docket N2021-1.

The US Postal System wasn't set up to make a profit but to ensure all US citizens have the same access to mail service regardless of where they live and who they are. These changes would not give the level of service and standards we have grown to expect and deserve; we deserve exceptional US postal service!

The US Postal System's focus should be on improving the delays that have plagued the service in the past year, not making a profit. Therefore, I am opposed to the proposed service standard changes which would permanently slow down the delivery of our mail.

The 10-year plan that is proposed will not even address the real profitability issue but will instead create a death spiral to the agency. All the money / profit woes began in 2006 when Congress mandated that US Postal System do something no other U.S. entity, public or private, is required to do: pre-fund future retiree health benefits decades into the future. Work on rectifying this issue.

I believe in Universal US Postal Service and the healthy survival of a public agency the people of this country have come to rely upon.

Yours truly,
